#### Box III TEXT OF THE ABSTRACT (Continuation fitem 5 of th first sheet)

In particular this invention allows using size limited clock counters for measurements of unlimited time ranges by combining unlimited numbe of intermediate samples without accumulating samples granularity error In addition to the measurements of the final time ranges, the intermediate samples are available for purposes of digital signal processing.

please start with: "A digital phase detector comprises a frame measurment configuration for counting a first signal clock during every frame of a second signal and for buffering the counted value until it is read by a phase processing unit."

Box No. VIII (iv) DECLARATION: INVENTORSHIP (only for the purposes of the designation of the United States of America) The declaration must conform to the following standardized wording provided for in Section 214; see Notes to Boxes Nos. VIII, VIII (i) to (v) (in general) and the specific Notes to Box No. VIII (iv). If this Box is not used, this sheet should not be included in the request.

### Declaration of inventorship (Rules 4.17(iv) and 51bis.1(a)(iv))

for the purposes of the designation of	the United States of America:
I hereby declare that I believe I am the original, first and sole (if only or is listed below) inventor of the subject matter which is claimed and fo	willen a parent is so-gain
This declaration is directed to the international application of which it	forms a part (if filing declaration with application).
This declaration is directed to international application No. PCT/ to Rule 26ter).	(if furnishing declaration pursuant
I hereby declare that my residence, mailing address, and citizenship at	re as stated next to my name.
I hereby state that I have reviewed and understand the contents of the a of said application. I have identified in the request of said application, in and I have identified below, under the heading "Prior Applications," b Organization, day, month and year of filing, any application for a patent States of America, including any PCT international application designated the before that of the application on which foreign prior to the application on which foreign prior the application of	bove-identified international application, including the claims a compliance with PCT Rule 4.10, any claim to foreign priority, y application number, country or Member of the World Trade or inventor's certificate filed in a country other than the United ing at least one country other than the United States of America, iority is claimed.
Prior Applications: US PROVISIONAL APPLICATION	1. No 60/206, 579
WITH FILING DATE 24 MAY 20	)00
I hereby acknowledge the duty to disclose information that is kn 37 C.F.R. § 1.56, including for continuation-in-part applications, mater of the prior application and the PCT international filing date of the co	ontinuation-in-part application.
I hereby declare that all statements made herein of my own knowledge are believed to be true; and further that these statements were made are punishable by fine or imprisonment, or both, under Section false statements may jeopardize the validity of the application or any	1001 of Title 18 of the United States Code and that such willful

(54) Title: HIGH RESOLUTION PHASE FREQUENCY DETECTORS

#### High Resolution Extension of the HRPD Config.2

A digital phase detector (57) Abstract: comprises a frame measurement configuration for counting a first signal clock during every frame of a second signal and for buffering the counted value until it is read by a phase processing unit. In particular this invention allows using size limited clock counters for measurements of unlimited time ranges by combining unlimited number of intermediate samples without accumulating samples granularity errors. In addition to the measurements of the final time ranges, the intermediate samples are available for purposes of digital signal processing.
